French firm to supply third generation of one-design Figaro racers, the first to feature foils

As with the second generation of Beneteau Figaro class boats , Nanni's N3.21 engine has been selected by the French yard to power the next generation Figaro Bénéteau 3: their first ever one - design, serial production monohull equipped with foils.

According to Nanni the engine meets the specific requirements of the Figaro Class, notably for its compact size and optimal weight distribution. In addition, the N3.21 engine also provides efficient technology to produce a high load of electric energy on-board and to ensure max safety in case of emergency.

The Figaro Bénéteau 3 has already won prestigious awards: the *European Yachts of the Year Award 2018* at the Düsseldorf Boat Show, the *Yacht of the Year Award 2018* at Yachts & Yachting Awards 2018, the *Best Sailboat Overall Award* and *Best New Sailboat Under 35ft Award* in Newport Boat Show, and the *Boat of the Year Award* by *Sailing World* magazine.
